

DirecTV Remote+

What are the requirements for the DirecTV Remote+ apps?

IR control requirements:

- If you do not have any networked DirecTV receivers but you do have a Samsung, HTC or LG phone or tablet with *built-in IR*, you can still control all of your receivers in the app. Note though that some features (such as the Mini-Guide and On Now information) require networked receivers in order to work correctly and as intended.

Network control requirements:

- DirecTV receivers *and/or* DVRs **connected to your home network and configured to allow external access**. Be sure to give them a name as well, such as "LIVING ROOM". Supported models are H21, H22, H23 and H24 HD receivers and HR20, HR21, HR22, HR23 and HR24 HD DVRs. **HR34/HR44 (Genie) and C31/C41 (client) receivers are supported!** R22s may work as well.
- An Android phone or tablet connected to your home network via WiFi. Alternatively (or in addition) you can control **one** single receiver over 3G/4G, etc. Genie owners can control the Genie and *all clients* over 3G/4G! [Read More](#)
