

DirectTV Remote+

How do I remove a receiver from the app?

Free & Pro Versions (starting with v3.7.0):

Prior to version 3.7.0, only Pro users could remove receivers from the app. However, starting with v3.7.0 free and pro users can remove a receiver from the app by long-pressing on a receiver in the Setup/Scan screen.

Pro version:

In addition to removing receivers in the Setup screen (see above), you can also remove single or multiple receivers using the List Organizer. To do so, press Menu > More > List Organizer. Here you can remove, rearrange or rename receivers, favorites and macros. To remove or rename an item, long-press on the item and choose Delete from the pop-up dialog.
