

DirecTV Remote+

The DirecTV Remote+ app does not display correctly on my mobile device.

I tried to account for the variety of devices out there when designing the app, but I certainly might have overlooked something. If the app is not displaying correctly on your device, please contact me please be as detailed as possible about your device and what is displaying incorrectly. Also, be prepared to send me screenshots in a follow-up email (if not included in your original email) as they would help me to fix the problem in a timely manner. 😊
